Well proven as the ideal first barrier to prevent dirt entering buildings, Frontrunner’s ingenious combination of an abrasive ‘diamond’ tread surface (to literally scrape away under-shoe dirt) with an open grid system (to let the debris automatically fall through) effectively prohibits dirt from being trodden inside a building. This efficient, high quality, clean-and-scrape system protects internal floor coverings and significantly reduces cleaning costs.

The special close-space design of the open grid bars also allows the product to be heel-proof and suitable for wheel chairs, shopping trolleys and other wheeled traffic.

Frontrunner is made from a hard-wearing, flexible PVC and supplied in rolls so that large areas can be conveniently covered by one piece of flooring. Modules can additionally be supplied with sub-dividing panels created by the use of joining strip-enabling extensions. This allows sections to be easily removed for periodic high pressure cleaning and other specialist cleaning such as the removal of chewing gum.

When used in conjunction with Frontrunner Plus, which additionally removes moisture, the system provides permanent entrance protection that is durable and certified slip resistant.
SUGGESTED USES
Indoor or outdoor entryways or other high-traffic areas.
Ideal for vestibules.

SPECIFICATIONS
Overall Thickness: 9/16" | 14mm
Roll Width: 4' in stock | 3' available

LIMITED WARRANTY
2 years - Ask for warranty sheet for details

MAINTENANCE
Daily: Vacuum with an industrial cleaner. Should stones, salt particles or other solid matter become embedded between the surface ribs, remove using a blunt instrument (screwdriver) or similar device. In addition to daily routine above, its important to remove chewing gum deposits and stains as they appear.

Weekly: Complete daily cleaning routine, then clean top surface using cylindrical brush machine. Initially work in direction of top ribs then across the ribs to complete cleaning. If a cylindrical brush machine is not available equally good results can be achieved using a high-pressure water extraction process.

Recessed Well Cleaning (as needed): Carefully lift and remove each section of grid matting one at a time. Once all of the Frontrunner sections have been removed vacuum/sweep the recess thoroughly, ensuring to pick up all stones or grit particles. Replace the matting sections as originally laid working from the edges to the center of the installation. When installing the sections at the edge of the frame, be sure to slide them under the frame lips.

TECHNICAL SPECIFICATIONS
Friction (ASTM C1028) Wet .54 | Dry .66
DIN 51130: R11, V10
Fire Resistance (ASTM E648) Class 1
Abrasion (ASTM D3884) 0.4%/ 1,000 cycles
UV Resistance Uncolored PVC material: BS EN 607 = Delta E 1.02

ENVIRONMENT
Portico Systems does not use any substances currently included in the SVHC (Substances of Very High Concern) list under REACH (Registration, Evaluation, Authorization and Restriction of Chemical substances) in any matting products. All PVC grid products are 100% recyclable.

LEED-NC: Version 3
IEQ Credit 5
MR Credit 4 (Black: 100% pre-consumer recycled; Gray: 32% pre-consumer recycled)

THERMAL
Functional -230C +600C (slight size variation may occur at temperature extremes).
